Mr. Francis O. Wilcox  
Executive Director  
Commission on the Organization of the  
Government for the Conduct of  
Foreign Policy  
2025 M Street, N. W.  
Washington, D. C. 20506

Dear Fran:

In response to your request of 25 March 1975 for a security review of eight analytical papers on intelligence planned as annexes to the Commission report, I enclose a report derived from reviews by appropriate authorities for security.

Whenever suggestions for deletions are made, we have proposed substitute language where possible.

The reviewers felt it advisable to sanitize the texts of a number of references which still remain technically classified by Presidential instruction. In most cases, the text can be sanitized by substituting other terms as we have proposed. If this is done, I am advised that the texts will be correct from a security classification point of view and there will be little change in meaning for the average reader.

In a few instances the text does not lend itself to substitution of terminology and only deletions are proposed. The proposed deletions do not significantly detract from the context, and we request that they be made.
